Release Summary

Team: Jason (P.O.), Riley, Jacky, Karthik, Jerry, Erik
Product name: Slug Grub
Date: 11/29/25

Key User Stories and acceptance criteria:
Sprint 1:

User Story 1: As a student, I want to navigate the dining hall menus from one location (website) so that I can save time
- Acceptance Criteria:
    - Open website and be able to view all dining halls
    - Be able to click on links to individual menus
    - Be correctly redirected to individual menus

User Story 2: As a student, I want to know what places is open and when things close so I know where to go and when I should plan to go
- Acceptance Criteria:
    - Choose a dining hall and be able to see the hours of operation
    - Be able to see the current meal and next meal times for a specific dining hall

Sprint 2:

User Story 1: As a student, I want info handy (not visually pleasing yet) such as being able to select foods by category, see their detailed allergen and nutritional info, menus of other cafes and markets and location/hours
- Acceptance Criteria:
    - Be able to view allergen information under each food card
    - Be able to organize food cards by categories (ex "dessert")
    - Be able to choose markets and cafes as well as dining halls on home page

User Story 2: As a student, I'd like to view and select relevant food information in an aesthetically pleasing way (core UI work)
- Acceptance Criteria:
    - Be able to see each food listed in an individual "card"
    - Be able to scroll through all cards for a specific dining hall or market/cafe

User Story 3: As a student, I want to know what places is open and when things close so I know where to go and when I should plan to go
- Acceptance Criteria:
  - Choose a dining hall and be able to see the hours of operation

Sprint 3:

User Story 1: As a student, I want to have a search function, so that I can find my favorite food
- Acceptance Criteria:
  - Be able to access search bar
  - Be able to edit search bar
  - Be able to find menu items from the dropdown menu

User Story 2: As a student, I want a food rating system, so that I can tell what is the best option at the dining hall
- Acceptance Criteria:
  - Be able to see the average rating of a food item listed on its card
  - Be able to click on the stars to submit a rating for a specific food item

User Story 3: As a student, I want to be able to see the macros of the food available
- Acceptance Criteria:
  - Be able to open the macros calculator
  - Be able to view and edit the calculator

User Story 4: As a student, I want to have an easy to use website with accessible UI elements
- Acceptance Criteria:
  - Be able to filter food cards by category or allergens
  - Be able to click on food cards to view more detailed nutritional information

Sprint 4:

User Story 1: As a student, I want a favorite foods list, so that I can come back to them
- Acceptance Criteria:
  - Be able to access the favorites page
  - Be able to edit the favorites page to save personal preferences
  - Have 'heart' feature on menucard

User Story 2: As a student, I want to be able to see important information at a quick glance
- ● Acceptance Criteria:
    - ○ Be able to read the dining hall names easily on the landing page
    - ○ Be able to scroll to the footer and access quick links
    - ○ Be able to access the filters and tags when scrolling through the menu

User Story 3: As a student, I want to be able to see future dates so I can plan my meals ahead
- ● Acceptance Criteria:
    - ○ Be able to click on a calendar and switch the date that the menu is displaying

Known Problems:
- ● Search functionality with multiple users could not be handled properly with supabase
